SIX CREAM

Six Cream is an innovation from ARVEA. This cream combines the benefits of aloe vera, argan oil and peony flower extract with brightening active ingredients and sun filters to deliver six simultaneous actions in a single application. It moisturizes and nourishes, provides anti-aging action, lightens and evens out the complexion, blurs dark spots, gives a healthy glow and offers very high sun protection with SPF50+.

With its easy-to-spread texture and soft, pleasant feel, Six Cream comes in two shades (light and apricot beige) to suit a wide range of skin tones.

How to use it:

On perfectly cleansed skin, apply Six Cream to the face and neck once a day, avoiding the eye contour area.

Do not confuse Six Cream with SPF 50+ sunscreen. In fact, this cream is not a tinted screen, as its use cannot be renewed throughout the day due to the lightening active ingredients it contains. So don't forget to use sunscreen 2 hours after applying Six Cream, if there will be any sun exposure.

Spray directly onto the skin, holding the bottle at a distance of 10 to 20 centimeters and focusing on pulse points (inside wrists, under earlobes...).

Avoid spraying perfume on the parts of the body where you perspire the most. Just choose one or two places at most to leave an olfactory imprint.

It's not necessary to put on a lot. A few drops are more than enough.

It's best to apply perfume to clean skin.

Never rub your perfume onto your skin to make it dry more quickly, as the odors are likely to dissipate very quickly.

Of course, only one fragrance should be applied at a time.
